How?

CIMT Coordinator Notified
CIMT Core Team and back-ups are alerted via Send Word Now, as needed
Core Team assembles
Coordinator briefs team on incident
Gather facts
Analyze 5 W's & H
Gather additional resources (Who & What needs to be obtained to resolve issue)
Develop Fluid Plan of Action for Team (Response Plan/Communication Plan)
Implement plans
Monitor progress; perform effectiveness check; make necessary adjustments
Recap Critical Incident /Internal debriefing
Team members initiate roles & responsibilities as directed by Coordinator
Coordinator delegates additional duties
Periodic updates from affected facility
Notification to relevant parties
INTERNAL: Sr. Management, Administrators, Security, Receptionist & affected sister/partner companies
EXTERNAL: USDA, FDA, FBI, Homeland Security, customers & area businesses, etc.
Establish debriefing & planning sessions to review known facts

Critical Incident ACTIVATION

- by CIMT Coordinator (or alternate Coordinator or other team member if Coordinator is not available)
- if it is determined that the event at issue rises to the level of a Critical Incident
- via “Send Word Now”

CIMT Coordinator

- Determines, in conjunction with applicable SME or team members, when an event rises to the level of a Critical Incident
- Chairs CIMT meetings
- Coordinates Critical Incident strategy
- Assigns specific responsibilities to team members
- Receives and distributes information to team
- Briefs Corporate Senior Management & Spokesperson
- Coordinates Communications Response with Spokesperson
- Coordinates all communications (internal & external) via external PR firm and applicable SME/team members
- Notifies and engages subject matter experts as necessary

Human Resources/Security

- Coordinates all internal communications to employees
- Provides employee information to CIMT as requested
- Alerts security personnel regarding Critical Incident
- Alerts Receptionists and Secretaries regarding Critical Incident
- Provides timely updates to CIMT Coordinator of progress in Human Resources/Security area
- Notifies employees regarding Critical Incident and report to work determination via a toll free number, as needed
- Returns employee and employee family calls, as needed
- Records activities in chronological Events Log

Operations

- Works with CIMT Coordinator and Media/Corporate Communications SME to develop response to customers
- Works with Sales & customers to ensure timely actions regarding products supplied to customers
- Coordinates with Quality/Food Safety to obtain product facts regarding products supplied to customers
- Coordinates with Plant CIMT if customer's products are manufactured at more than one OSI facility
- Provides timely updates to CIMT Coordinator of progress in area of responsibility
- Records activities in chronological Events Log

Quality/Food Safety

- Communicates with government regulators, food inspectors, etc. as needed
- Gathers necessary information regarding product manufacture, storage, distribution and shipment, etc.
- Analyzes food safety/quality issues to determine the breadth of the situation and remediation focus
- Coordinates product recall efforts, if any
- Provides timely updates to CIMT Coordinator of progress in Quality/Food safety area
- Record activities in chronological Events Log

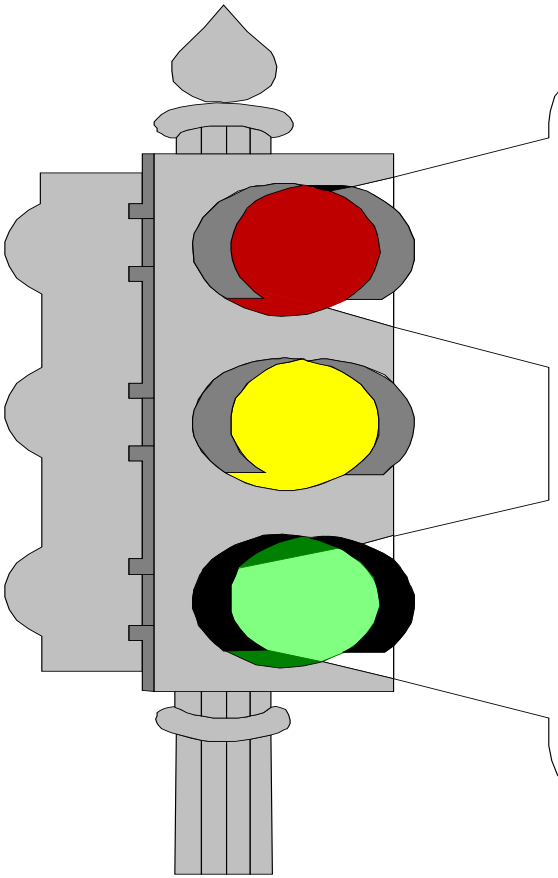

Risk Management

- Communicates with insurance companies, as needed
- Provides timely updates to CIMT Coordinator of progress in Risk Management area
- Advises on insurance coverage for incidents
- Record activities in chronological Events Log

Spokesperson

- Coordinates with CIMT Coordinator, Media/Corporate Communications SME and external PR firm for external Communications Plan
- Shall be trained and prepared for media contact
- Follows Media Do's and Don'ts during media contact
- Stays abreast of facts related to the Critical Incident

What Roles Are Critical to A Critical Incident?

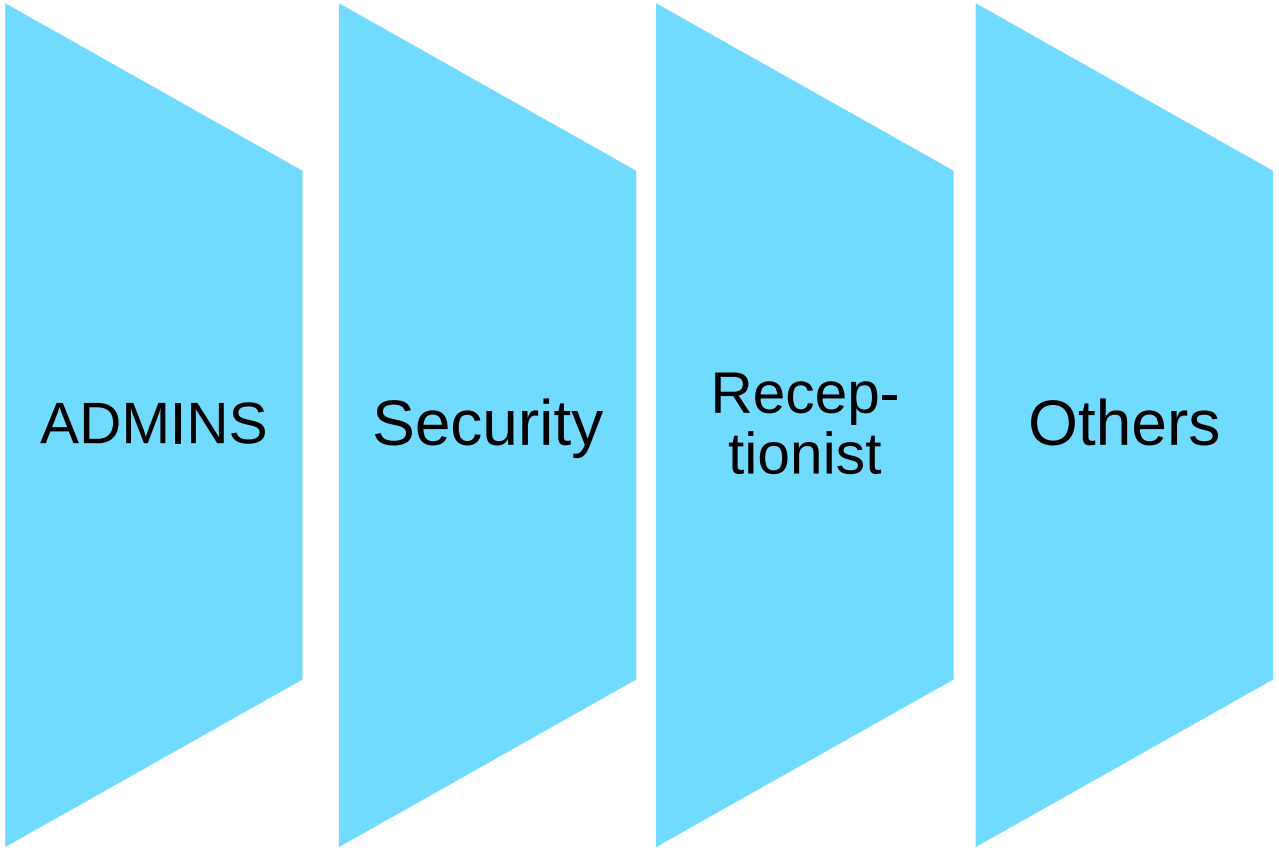

CAUTION:

FACT SPECIFIC

What Other Employees Play An Important Role in A Critical Incident?

ADMINS
Security
Recep-
tionist

Where Do We Go From Here?

Changes are Inevitable

- Changes in roles and processes
- Changes in laws: FSMA new requirements for recall
- Changes in technologies

If In Doubt….

- **Pick Up the Phone**

CIMT Mobile/Web Application

Scenario #1

There is a hazardous chemical leak in your plant. What should the plant do?

A. Notify the National Response Center within 15 minutes of the incident
B. Notify the State Emergency Response Commission
C. Notify the Local Emergency Planning Committee
D. Notify Corporate CIMT Coordinator
E. All of the above.

Scenario #2 – Part I

Some consumers complained to the media alleging they got deathly ill within 2 hours after eating hamburger meat manufactured at one of our facilities. The media is claiming that the consumers were affected by E-Coli.

1. Reporter A called the Corporate office and asked to speak with the person in charge regarding the allegations. Mary works at the Corporate receptionist desk and answered the call. How should she proceed:

A. Transfer the reporter to the QA department
B. Asked the reporter details of the allegations and answered the reporter's further questions
C. Get the reporter's contact information and promises that someone will call him back
D. Get the reporter's contact information and promises to forward it to the appropriate person

Scenario #2 – Part II

2. Reporter B shows up at the gate of the OSI facility that produced the alleged products and stopped some employees in the parking lot to talk with them. Mario is a security guard working at the facility. Mario should

A. Direct the reporter to the receptionist desk
B. Kindly inform the reporter to leave the premises & escort him/her off the property
C. Inform the reporter to leave, but grants permission to his request to first use the restroom inside the building
D. Call the police

Scenario #2 – Part III

3. Bill works on the production line of the facility that produced the alleged products. Bill's neighbor works for NBC news and ran to Bill while walking his dog around the block. The neighbor asked Bill about the allegations. Bill and his neighbor have been friends for over a decade.

A. Bill told his neighbor off the record some inside story about the facility operation
B. Bill informed his neighbor that the company is committed to food safety and that the matter was being handled by the appropriate corporate team
C. Bill told his neighbor never to believe those allegations
D. Bill passed on the plant QA manager's contact information to the neighbor for further inquiry.

ANY QUESTIONS?

REMEMBER….

If you hear, see or learn of something that you believe may be critical to the company, please inform your supervisor.
